

PERFECT IN TECHNOLOGY & DESIGN

Helmut Seitz

AUTOMOTIVE PRODUCTS

40 YEARS OF QUALITY AND SERVICE

Helmut Seitz GmbH has been founded more than 40 years ago. Since that, we have been specialising in the development and sales of professional licence plate holders for the highest standards of the car trade.

The licence plate holder is "the" business card of your company. For that reason, only the best is good enough to transport your advertisement.

Our specialisation on licence plate holders, close collaboration with our customers and many years of experience have made us able to offer the best products on the market. We are the leader in quality, technology and design.

We provide our "Klipp Top" series with innovative 2-component technology and standard integrated TPE dampers. These sophisticated and user-friendly products have been positively reflected by the market.

Since the year 2000 we constantly expand our exclusive sales line with give-aways, workshop supplies and newly developed products, as the matchless "Flexi Top" plate holder.

Competent personal advice and service by our team, our endeavor for perfection in technology and design conduce the satisfaction of our customers.

You too can benefit from the licence plate holders of the market leader, because image has a name – Seitz.

SERVICE

	Important information about your order	14
--	--	----

Klipp Top® 4 – the most wanted

- The **perfect licence plate system** with an attractive appearance – the standard for technology & design
- No retaining lugs, brackets, corners or edges. Optional: elegant surrounding rim
- The longest possible advertising area without interruptions
- Design options: exclusive raised advertising texts with logos | 3D labels (point-wise or full surface)
4-colour direct digital printing | Standard silk-screen printing

Perfect damping

Undesired licence plate noises are suppressed by progressive damping. Paint damage and noises on the vehicle are prevented by additional rear damping of the holder.

Safe handling

Handling from the front and opening from the inside reliably prevents accidental paint scratches.

Ergonomic fitting

The frame folds down and does not obstruct. Pre-attachment of the licence plate for free hands during handling.

Robust closure

Genuine wear-free hinge connection with ball lock.

Your business card: Perfect in technology & design

Common features of the Klipp Top 4 and Klipp Top 5

All inclusive

- A constantly updated mounting hole schema
- Integrated washers
- Legal conformity (74/483/EWG)

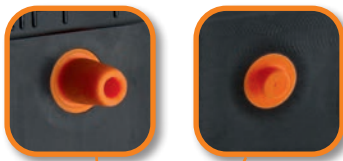

Maximum versatility

Ready for professional change of Top-Cards, temporary signs and normal licence plates

Klipp Top® 5 – the allrounder

- Optimised for narrow mounting situations and close parking sensors based on the Klipp Top® 4
- No retaining lugs, brackets or edges. Optional: elegant surrounding rim (when the licence plate is inserted)
- The longest possible advertising area without interruptions
- Design options: exclusive raised advertising texts with logos | 3D labels (point-wise or full surface)
4-colour direct digital printing | Standard silk-screen printing

Perfect damping

Undesired licence plate noises are suppressed by progressive damping. Paint damage and noises on the vehicle are prevented by additional rear damping of the holder.

Interchangeable licence plate function

Integrated and professional solution for interchangeable licence plates. (Patented)

Ergonomic fitting

The next work step can be started immediately after the band has been folded down. Pre-attachment of the licence plate for free hands during handling.

Robust closure

Genuine wear-free hinge connection with ball lock.

Safe handling

Handling from the front and opening from the inside reliably prevents accidental paint scratches.

Vision and innovation safeguard the future.

Maximum stability and flexibility

High-quality special primary plastic and generous wall thicknesses withstand even the roughest conditions. High flexibility enables installation on straight and curved surfaces.

Service

The correct data

Vectors instead of pixels

You have an individual company logo? An unique font? Please try to provide us with the printed data in "vector" format.

"Mathematical formulas" are used in this process to graphically display shapes, making it possible to enlarge or shrink them in any way desired without effecting the quality of your print.

This is not the case with pixel data, however. Pictures taken by digital cameras or those used for offset printing become unclear and "pixelized" when resized.

Comparison:

Vector graphic

Pixel image

If you do not have any suitable data available, we will be happy to handle the vectorisation for you on a time and material basis!

Installation instructions

Installation films and instructions regarding our products available at www.helmut-seitz.de or simply ask our service team.

Every carton of licence plate holders additionally includes an installation manual and a free professional opening tool for you.

Your order – made easy

Personal service is one of our particular strengths. We are always available to advise and assist you.

Shortly after clarifying all order details, we will send you a copy-proof in accordance with your specifications.

Your design will not be released for production until it meets 100 % with your satisfaction.

Our General Terms and Conditions apply. They can be viewed at: www.helmut-seitz.de.
